EXPERIENCE

UI Developer - BAM Technologies (Nov 2021 - Present)

- Promoted to the Core UI Team to assist the frontend work of other teams.
- Develop accessible and responsive UI components used by 50+ developers.
- Collaborate with designers to refactor the platform's design system.
- Building out a style guide to house design system components and documentation to improve developer productivity and product quality.
- Documenting frontend best practices for responsiveness, styling, and accessibility, and performance to ensure consistency across the platform.
- Pushing for stricter accessibility testing to ensure 508 compliance per government contract requirements.

Software Developer - BAM Technologies (May 2021 - Nov 2021)

- Performed full-stack development in OutSystems for one of multiple teams at BAM serving the Airforce's MyVector platform.
- Successfully deployed the Relocations application within MyVector from Sprint 0.
- Wrote backend APIs in OutSystems, performed DB migrations with EF Core.

Student Developer – KSU Residence Services (June 2020 - May 2021)

- Developed web applications for Kent State University using .NET Core, Angular with NgRx, and MSSQL.
- Built KSU Person Info and call center application from scratch.

SKILLS

Languages: Javascript, HTML, CSS/Sass, Python, SQL, C#

Frameworks: Vue.js, Bootstrap, Flask, Vuex, Angular

Tools: Git, NPM, Webpack

PROJECTS

KSU Course Planner - <https://github.com/ThatManTrey/ScheduleBuilderCap>

- Developed a more user friendly course catalog and planner for KSU students using Vue.js, Bootstrap, Flask, and MySQL.
- Structured front-end app using Vuex to share state across SPA pages.
- Built authentication API with email verification using Flask JWT Extended.
- Assisted other team members in learning Vue.js, Flask, and REST APIs.

EDUCATION

Kent State University (Aug. 2017 – May 2021)

Bachelor of Science in Computer Science (3.9 GPA)
